TOC

Overview

MyCity is a Platform from the people for the people. Its goal is to empower communities through an inclusive and participative process. As a community, problems for city budgeting and infrastructure are spotted more easily and solutions can be implemented more rapidly. By focusing on democratic values, the direct participation of citizens is finally possible in the digital age.

Problems to Solve

1 Financial decisions by government organisations are often not well understood by their constituents

3 Mistakes in planning happen

#RealerIrsinn

2 Choosing between alternatives is hard, especially because the people most affected by them are not always well represented

4 Small problems as broken garbage bins are often not known as noone informs others about them

Understanding the market

Understanding the Market

1 The average voting participation in CH over the last 30 years was 45%. Lots of people are not well informed about the ongoing and upcoming projects.

2 Some projects are not funded by the government. However, they might still be realizable through crowdfunding of affected users.

3 Interests of minorities not always included in the political landscape.

4 People are not in touch with other people from their communities. Getting to know the people around you benefits everyone.

We present...

MyCity

Proposed solution

MyCity is a Platform from the people for the people. Its goal is the improvement of communities through an inclusive and participative process. As a community, problems for city budgeting and infrastructure are spotted more easily and solutions can be implemented more rapidly. By focusing on democratic values, the direct participation of citizens is finally possible in the digital age.

Core Features

Direct Participation

Participants can submit their own ideas and proposals

Population Feedback

Projects and ideas can be voted and commented on

Direct Budget Participation

Every citizen can distribute a small amount of their taxes to projects they like

Core Features *(continued)*

Sustainability Label

By making citizens aware of the environmental impact of project proposals a higher degree of sustainability can be achieved

Proposal Submission

Problems and Solutions can be submitted by citizens & companies

Around You

Filter and especially look for proposals around you, as those are the ones you are most likely interested in and will be affected by.

Application Workflow Demo
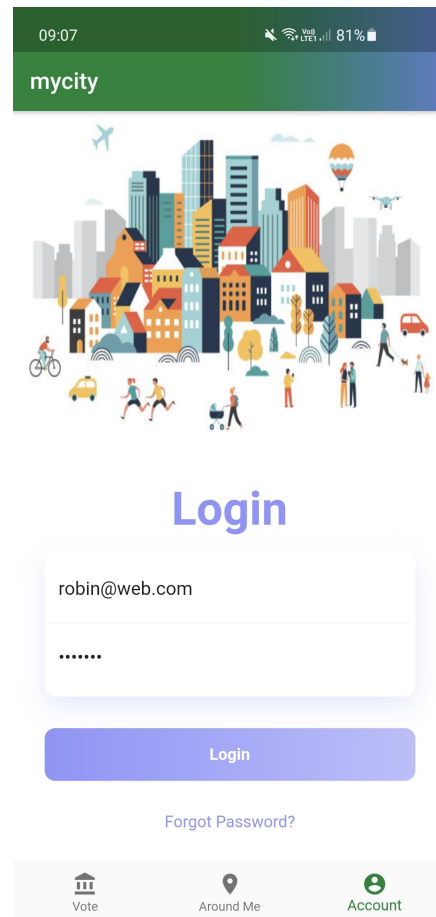

See local projects from your community
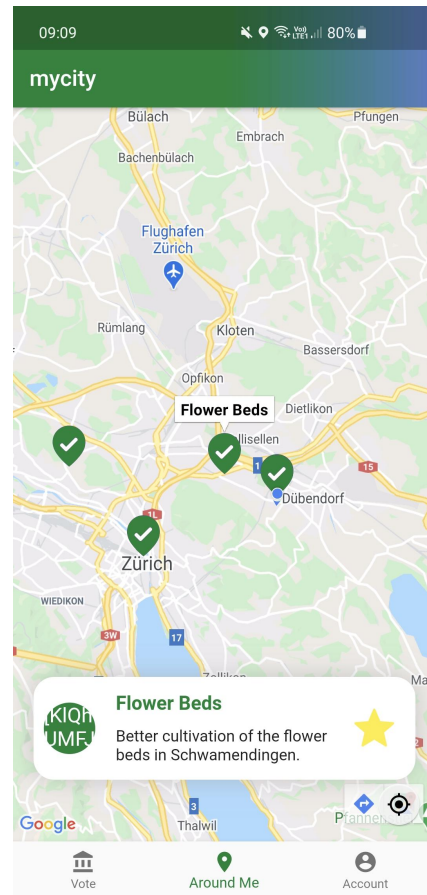

Get more information about individual projects by clicking on them

Look at the details of the different projects in order to get a better understanding on the issues.

Tripping on street

fund 👍2 👎0 share ☆

High risk of injury

Better access for people in love

The stone pose a <u>huge</u> risk when walking back home. We propose

- Remove the stones
- Add green spaces
- Get better access

Make an offer   Participate

Flower Beds

fund 👍2 👎1 share ☆

Better cultivation of the flower beds in Schwamendingen.

Make an offer   Participate

Renovation of Historical ...

fund 👍8 👎1 share ☆

Renovation of Swiss National Museum (Schweizerisches Nationalmuseum) providing more value and thus attracting more visitors and tourists.

Make an offer   Participate

Get involved with your community!

Upvote or downvote a project in order to indicate if you think that it is an important issue.
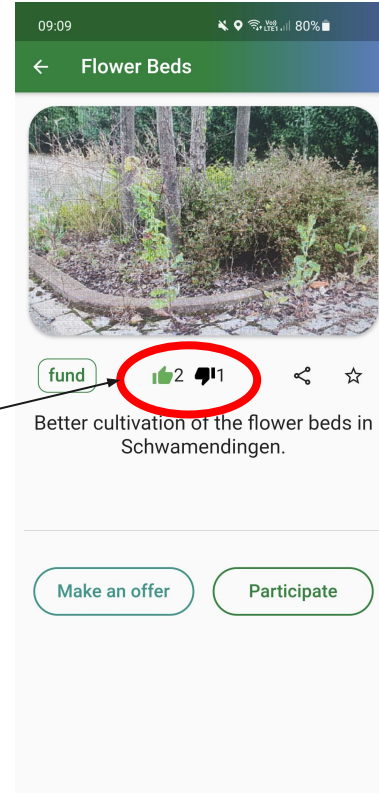

Decide where your tax money goes!
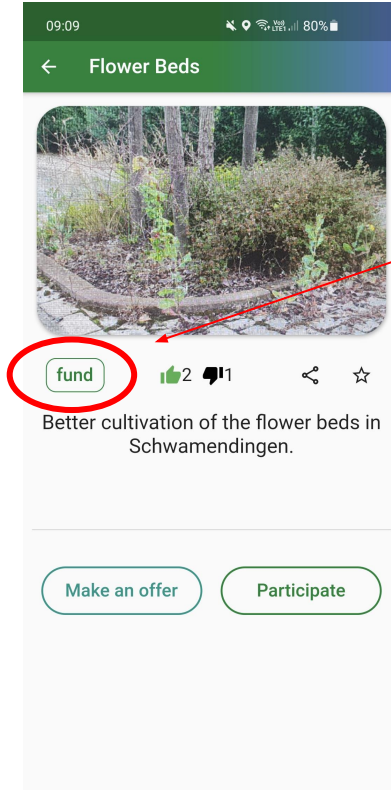

Fund the projects that are dearest to your heart!
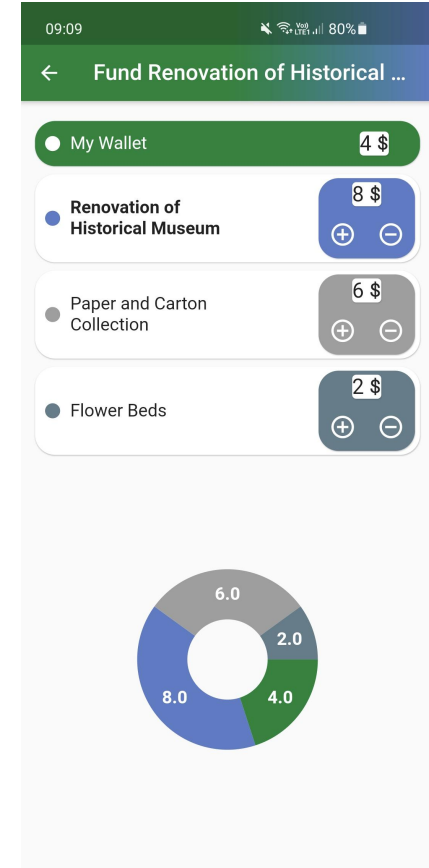

# Get involved with your community!

Are you a company specialized in solving those kind of problems (e.g. a gardener in this case?)

-> MAKE AN OFFER!

You AND your community benefits from that!

#communitylove
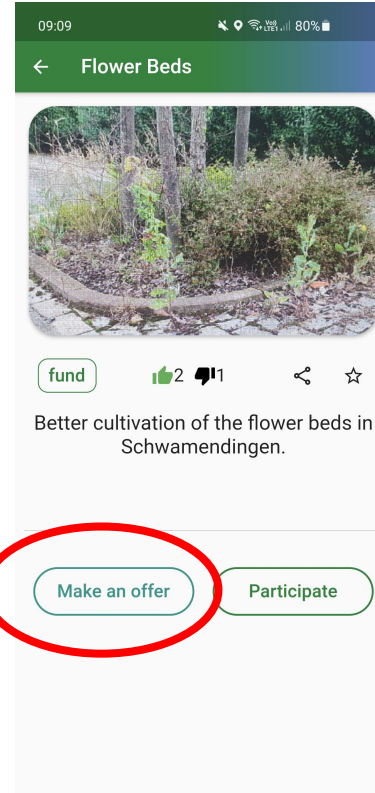

Get involved with your community!

Are you also affected by this problem and are willing to volunteer in order to solve the issue?

-> PARTICIPATE!

#BETTERTOGETHER

# Have an overview over all of the projects you are involved

See your contributions
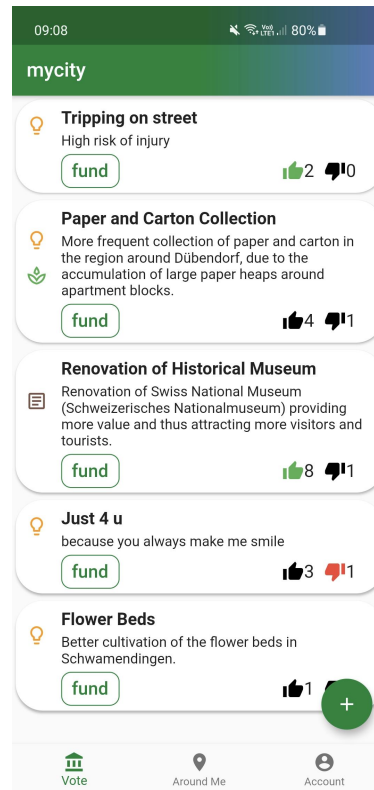

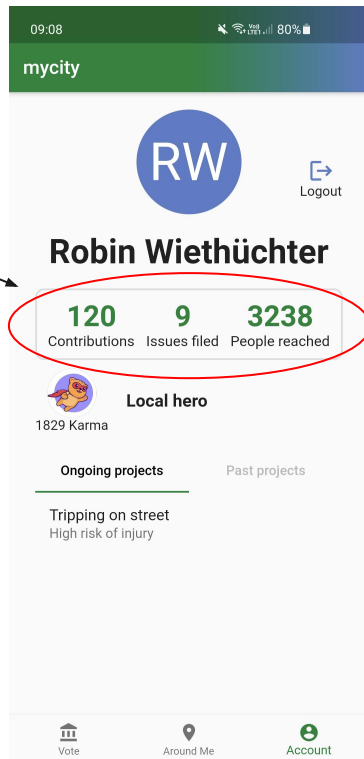

Have an overview over all of the projects you are involved

Get rewarded for active participation in the community
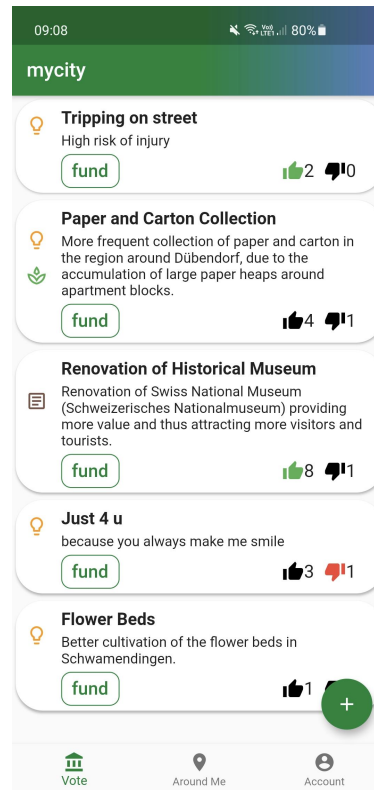

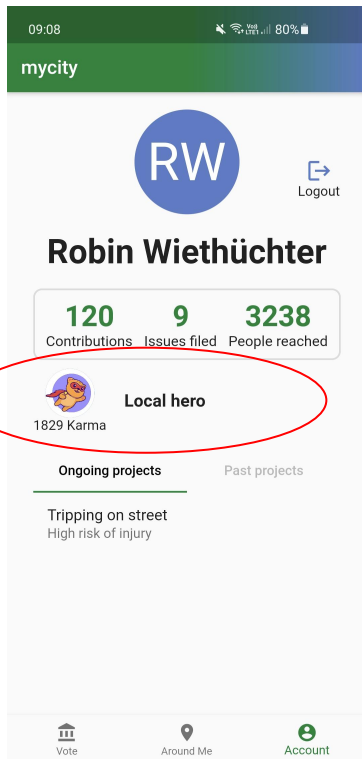

Have an overview over all of the projects you are involved

Overview of the ongoing and past projects
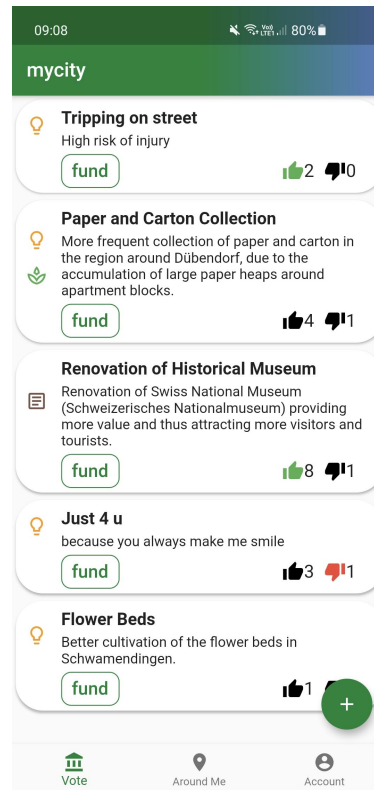

File a new issue

Provide the most important information concerning your own project

Thank you.
